

## What makes installing the ProTrap® so quick and easy?

Shur-Co's ProTrap® electric hopper opener comes preassembled, with all the required wiring and connections. The patented SMARTwire™ sealed harness, standard on the ProTrap®, was developed to improve the durability of the connectors in our electric accessories. The SMARTwire's sealed connections greatly reduce install time – no additional wire stripping or crimping of connections is required.

The sealed SMARTwire™ junction block replaces the gray junction box with terminals and grommets that was being used previously. This allows for easy expansion to additional SMARTrailer® accessories. You get plug-and-play convenience for your ProTrap®, plus a 12-volt tap to supply power to add-ons like the 4500 Series HD electric tarp, electric Gate and Hoist, Auger Drive and LiteALL™ LED work lights..

Everything you need for installation is included. The SMARTwire™ harness has molded rubber connectors and silicon seals, full 1/4" brass pins and sockets and dual 6-gauge wire.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at [www.shurco.com](http://www.shurco.com).
