

Where can I find the serial number on Shur-Lok® tarps?

Here at Shur-Co®, we want to be able to track your tarp every step of the way, during our manufacturing process and beyond. In order to do this, we sew a tracking label into each and every tarp we make.

This new serialization label matches the bar code that is scanned into our system, allowing easy identification of each specific tarp. These labels are in a consistent spot for each type of tarping system, which can be seen on the chart below, on the reverse side of your tarp. If you are ever asked for the serial number, this chart will help you locate it quickly and easily.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at www.shurco.com.

Top: This bar-coded serial number is sewn into every Shur-Co® tarp. Inset: Previously, the serial number was on the tag with the Shur-Co® logo and phone number; this is no longer the case.
