

## What are the differences in Shur-Co's tarp materials?

**VALUE SERIES.** This tarp is narrower, with shorter tensioning straps than a Super Duty tarp. Value Series is an economical choice with the same 12-month warranty as Super Duty but can limit the user's ability to tarp over heaped loads. Also, this tarp is only available in an 18-ounce fabric weight.

**SUPER DUTY.** This one-step-up tarp is available in two weights – 18 and 22 ounce. Wider than the Value Series tarp, it is built in the same fashion you see on most new grain trailers. The longer tensioning straps provide for slightly better tightening while the extra width makes tarping heaped loads easier. If you haul aggregates or something other than small grains, using a Super Duty 22-ounce tarp is recommended.

**DISTILLER'S GRAIN.** Due to processes used in production of corn-based ethanol, the distiller's grain created as a co-product presents unique hauling – and tarping – challenges that other tarps are not designed to withstand. The chemical composition of distiller's grain, combined with high temps and UV exposure, make tarp material stiff and brittle, resulting in premature cracking and tearing. This means more frequent tarp replacements – often six months or less for daily haulers. Our Distiller's Grain (DG) Tarp utilizes material formulated for superior UV protection, high-temp performance, chemical resistance and increased adhesion for increased tarp life. We recommend it for any trailer hauling distiller's grain in wet or dry application or other material that might be chemically altered.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at [www.shurco.com](http://www.shurco.com).

Top: Count on Shur-Co® tarps for superior-quality materials and workmanship. Each lot of fabric is lab tested for tear strength, adhesion resistance and cold-temperature flexibility.

At left: Seams are heat welded; the added thickness creates a much better moisture barrier.

### DIAMONDCORE™.

This premium fabric, a Shur-Co® exclusive, features additional

material, unparalleled abrasion resistance and extra reinforcement straps. Unlike diamonds, no tarp lasts forever, but DiamondCore™ provides rock-solid quality backed by a 24-month warranty – the best in the industry. (Currently only available in black and for grain trailer applications.)
