

AUTOTRAP™

ELECTRIC HOPPER OPENER

A014FL-0620

FEATURES AND BENEFITS

- Integrated Rock Shield,
- Thru-Bore Motor
- Protective Motor Sleeve
- Universal Mounting Bracket
- Emergency Back-Up Crank,
- SMARTwire™ Sealed Harness
- Thru-Bore Manual Drive Shaft w/3/4" Hex Milled End

AutoTrap™ combines the best elements of Shur-Co® SMARTrailer™ design! You get a compact, high-clearance system at an affordable price, with patented SMARTwire™ connections and built-in compatibility with our SMART2™ or SMART3™ remote.

The thru-bore motor design of the AutoTrap™ has performance characteristics comparable to our ProTrap® system, but in a more compact size and weight – nearly 40% lighter! This design also allows for easy one-bolt conversion to manual operation, if necessary. The protective polymer sleeve acts as a corrosion barrier between drive shaft and motor. This system has a one-size-fits-all design, to interface with 1-inch, 7/8-inch or 3/4-inch crank shafts. Wireless operation via pre-programmed SMART2™ or SMART3™ remote is standard while push-button controls at each opener are also included.
