

PROTRAP™

ELECTRIC HOPPER OPENER

A015FL-0620

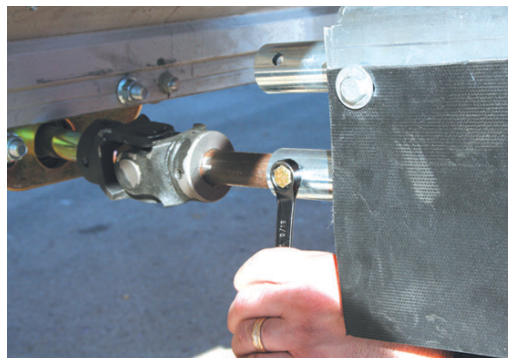

FEATURES AND BENEFITS

- All-Metal Gear Motor
- Automatic Brake (holds hopper door)
- Universal Mounting Bracket
- 1-Bolt Manual Changeover
- Master Disconnect Switch
- SMARTwire™ Sealed Harness
- SMART2™ or SMART3™

The best 1-2 punch in trailer automation! Pair your 4500 Series HD electric tarp with the ProTrap® electric hopper opener; the metal gears and housing are designed to handle the hard stops. Slide hopper doors open and closed with the touch of a button while you stay away from the dust.

The ProTrap's high-efficiency planetary gear reduction and breaker circuit at the battery protect your motor – no need for unreliable, easily damaged limit switches! Actual torque varies based on wire size, length and battery voltage; our motors are sized to protect your trailer components. The 150 low-torque motor is standard for trailers with strap-style traps, the 250 motor for rack-and-pinion traps. Our SMART2™ and SMART3™ remotes deactivate when the flip-style covers are closed or shut off after three minutes inactivity. A cab- or trailer-mounted master disconnect switch kills power to tarp and traps – no complicated button sequence. Our patented SMARTwire™ harness has a sealed, quick-connect design to reduce connector corrosion and add plug-and-play convenience at installation.
