

APEX™

CHIP AND REFUSE TRAILER TARP SYSTEM

SC012FL-0722

FEATURES AND BENEFITS

- Easily covers chip and refuse loads as tall as 24" above the trailer top rail.
- Fits trailers with reduced spacing between the tractor (cab) and the trailer.
- Unique two-knuckle rear arm (patent pending) allows APEX™ to operate effectively on trailers where rear door top hinges are located as much as 10" forward from the rear of the trailer.
- Retrofit-able to trailers where manual tarp systems or other automatic systems are already installed.
- Superior motor & circuit protection.

Patent Pending

NEW to Shur-Co's extensive line of product offerings, the APEX™. The APEX™ was specifically designed for use on open top vans, trash trailers and woodchip trailers, and is compatible with existing roll tarp systems that are currently utilizing flat caps. The low profile arm design allows for better cab clearance and increased heaped load capability*. The APEX™ can easily traverse loads up to 24" above the top of the trailer and it is Express Mode capable with the SMART2™ and SMART3™ remotes. All metal direct drive motor with SMARTwire™ connectors eliminates corrosion.

**It is the operator's responsibility to load and operate the vehicle within the vehicle manufacturer's specifications.*

THE SHUR-CO® DIFFERENCE

APEX™ addresses covering challenges than other systems don't... Extremely Tall Loads

Load peaks are typically highest immediately after loading and before the material has settled. The APEX™ hinged front and (patent-pending) rear arms allow the system to cover loads as tall as 24" above the trailer top rail easily and effectively in seconds.

Tight Spacing

In situations where operators have limited spacing between the back of the cab and the front of the trailer, tight turns can damage automatic tarp system components. The APEX™ system's low-profile electric motor allows use of the APEX™ system on trailers when other covering systems may not be a viable option.

Challenging Rear Door Hinges

Unique two-knuckle rear arm (patent pending) allows APEX™ to operate effectively on trailers where rear door top hinges are located as much as 10" forward from the rear of the trailer. Forward-mounted rear hinges render most other tarp systems' rear arms unusable. The APEX™ gets the job done when the others cannot.

Retrofit-able

APEX™ is compatible with most brands of roll tarp systems with flat caps. Owners of manual side to side tarp systems interested in converting to electric OR those unsatisfied with their current electric tarp systems can upgrade by retrofitting their trailer with the APEX™.

Superior Motor and Circuit Protection.

APEX™ offers "Express Mode" functionality when used with capable models of Shur-Co's SMART series remote controls, which provides automatic, one-push covering and uncovering without current spikes. SMARTwire™ connectors seal all terminal connections and eliminate corrosion.
