STANDARD V. OPTIONS

Each Shur-Co® system comes with standard features. These are bulleted (●) and noted as **Standard** in bold type under STANDARD FEATURES AND OPTIONS, like the telescoping nylon crank retainer (of which you receive one) below right. Any change from these standard features affects the cost of your system. This is noted as an "add," "deduct" or no charge "N/C."

If you replace the standard galvanized steel end caps with a set of aluminum end caps, for example, you'll need to add to your total cost. If you opt to go without the standard 1" ridge strap(s), you would deduct per strap.

If you have questions on options and upgrades, there is a complete list of photos and descriptions (*see* pgs. 13-15).

NOTE: All prices in this catalog are subject to change without notice. All components other than standard may require a non-refundable $100 special processing fee. Call for details.

CABLE-LOK™ FOR GRAIN CARTS AND WAGONS

Start with your box dimensions from the chart below, rounding up as needed. Using the STANDARD FEATURES AND OPTIONS chart at right, add or deduct as instructed for any changes from the bulleted (●) standard equipment.

The nylon spool with 18" galvanized cable combines strength with endurance. Ratchets let you adjust tarp tension; upgrade to the 42" cable ratchet for convenience at no extra charge.

Whichever crank arm you choose can be positioned at the side or the rear of the box for the lowest profile.
