

TURNING POINT BOW™

ELECTRIC SYSTEM

SC003FL-0819

FEATURES AND BENEFITS

- Electric Cut-Off Switch
- Automatic Overload Slip-Clutch
- Easy Electric-to-Manual Conversion
- Locking Skid Plates

Bows swing up and out of the way for loading at the touch of a button! Our exclusive Turning Point Bow™ system, which moves the bows out of the way with the pull of a rope, is now available in an electric upgrade. This allows the operator to remain safely in the cab while operating the system with a rocker switch or remote control.

In manual or electric, our Turning Point Bow™ system's center pivoting ridgepole holds the tarp without sagging, so you need fewer bows. The locking system provides secure support during transport and serves as a skid plate when bows swing closed.

THE SHUR-CO® DIFFERENCE

BOWS MOVE IN A SINGLE MOTION

Engineered for Harsh Conditions

The electronic actuator is designed for long life in the harshest outdoor environmental conditions. The Electric Turning Point Bow™ system operates safely in temperatures ranging from -38° to 140° F.

Operation

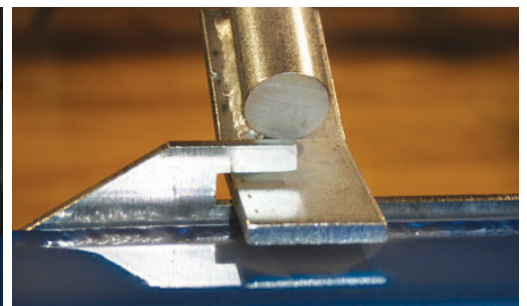

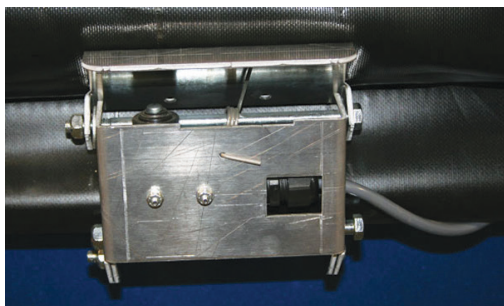

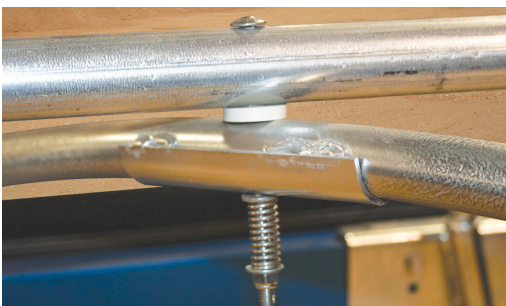

With our patented design, all of the bows move as one, in a single motion, swinging up and over loads without binding. Reverse swing bows are also available.

Easy Manual Conversion

In the event of an actuator, wiring or switch failure, the system can be easily converted to manual operation.

Safety Features

- IP66 Environmental Protection Rating on Electric System
- Integrated Brakes Lock the Actuator from Any Movement
- Integrated Overload Slip-Clutch Automatically Protects Actuator from Overload
- Cut-Off Switch Prevents Actuator from Operating Unless Roll Tarp is Completely Open
