

TURNING POINT

BOW SYSTEM

A018FL-0620

FEATURES AND BENEFITS

- Durable Swivel
- High-Clearance Bows
- Easy Release and Capture
- Gatorshield® Tough

Bows swing up and out of the way for loading! Our exclusive Turning Point Bow™ system is controlled with a pull of the rope, while the operator remains safely on the ground. This tarping system, exclusively from Shur-Co®, is perfect for those who haul heavy aggregate and are continually damaging their bows during loading.

A center pivoting ridgepole holds the tarp without sagging, so you need fewer bows. Angled brackets allow the bows to move freely, for a smooth operation from start to finish. The patented locking system provides secure support during transport and serves as a skid plate when the bows swing closed.

When you upgrade to our Electric Turning Point Bow™ the operator remains safely in the cab while operating the tarp system with a rocker switch or one of our SMART™ remote options. Perfect when operating in hazardous work zones.
