

SHUR-MATIC®

ALUMINUM FLIP TARP

SC010FL-1019

FEATURES AND BENEFITS

- Anodized Aluminum 1-Piece Arm
- Anodized Aluminum 1-Piece Windshield
- Shur-Seal™ Plated Components
- Gatorshield® Elbows/Tube Crossover
- Durabuilt™ Motor w/3-Year Warranty

Whether you are hauling silage or corn, you need a tarp system that is as dependable as the rest of your equipment. Shur-Co® understands that downtime costs you money and there is no worse situation than to be down because of a failed tarp system.

The Shur-Matic® was designed with reliable and durable operation in mind. For applications on silage trailers and other end dumps, Shur-Co® has the set up you need to meet your tarping needs. Conditions aren't always ideal for using tarps, which is why the Shur-Matic® was designed — ease-of-use and ease-of-repair.

- 4-Spring Side Mount - Up to 18'
- 5-Spring Side Mount - Up to 24'
- Torsion Spring Hex Shaft - Up to 28'
- Torsion Spring with Hex/Round Shaft - Up to 37'
- Standard and Frameless Options Available

THE SHUR-CO® DIFFERENCE

Eliminate Joint Weakness

It starts with the arms. The extruded aluminum tarp arms are 1-piece, which eliminates weakness caused by a 2-piece transition or joint. The arms are also guaranteed unbreakable.

Finer Tension Adjustment

On longer applications, high-strength steel alloy pivot shafts feature a milled hexagonal shape for finer tension adjustments than square profiles commonly used in the industry. The cast steel hexagonal pivot connector is also nickel-chrome plated for lasting corrosion resistance and lasting good looks.

Gatorshield® Tough

A 2-piece assembly allows the crossover/tarp tube to be custom fit to any width trailer. Built from strong Gatorshield® galvanized steel tubing, the elbows provide a strong transition from the arms to the tarp tube while keeping corrosion resistance in mind.

Increased Corrosion Resistance

Every component of the Shur-Matic® was reviewed for risk of corrosion. The 1-piece extruded aluminum arms and windshield are anodized to reduce wear and scratching while providing improved corrosion resistance that you don't get with regular polished aluminum arms. All exposed steel components and brackets are plated for increased corrosion protection. Additionally, our clock springs in the 4- and 5-spring configurations are e-coated, for protection.

Arm Options

For shorter applications that need to clear doors or loading areas, the arms come with a 2-foot, 30-degree bend. On longer applications, the system comes standard with straight arms.

Fast and Easy Tarp Installation

The solid vinyl or mesh tarp can be mounted with screws directly into the extrusion or with square nuts inserted into the tarp axle channel for fast, easy replacement.

Standard Electric Systems

The Shur-Matic® comes standard with our Durabuilt™ motor backed by a 3-year limited warranty. All wiring, cable ties and connectors necessary for installation are included in the system when you receive it. The standard electric system also comes with a rocker switch that can be mounted in the cab for safe, reliable operation. A cab-installed rocker switch allows you to open and close the system from the comfort of your truck cab. Our SMART™ remotes are available. Control multiple Shur-Co® wireless products with a single remote at ranges of over 100'.
